

## **Priddy Phone Box Defibrillator**

The Parish Council has replaced AED (Automatic External Defibrillator). The new unit operates in the same fashion as the previous unit and announcements guide the user through what to do when the defib needs to be used.

The Council has decided to circulate the code for the box in which the unit is housed, so that access can be as quick as possible; this is a valuable piece of equipment but its true value is only realised when it is used quickly.

## **Priddy Defibrillator Access Code**
